

Studies

Members of the Institute of Chemistry of Clermont-Ferrand (ICCF) are highly involved in higher education in chemistry, participating in different diplomas delivered by Clermont Auvergne University (Department of Chemistry) and by Sigma Clermont:

- The [Department of Chemistry](https://chimie.uca.fr/contacts-et-plan-daccés) (https://chimie.uca.fr/contacts-et-plan-daccés) of Clermont Auvergne University provides education in chemistry for students seeking academic or industrial careers, in the fields of research or teaching.
- [Sigma Clermont](http://www.sigma-clermont.fr) (http://www.sigma-clermont.fr) provides engineering diplomas in chemistry.
- ICCF is also a host research laboratory for the [Doctoral School in Fundamental Sciences](https://sf.ed.uca.fr/lecole/ecole-doctorale-des-sciences-fondamentales) (https://sf.ed.uca.fr/lecole/ecole-doctorale-des-sciences-fondamentales) (EDSF). Thus, ICCF research teams are fully involved in post-graduate studies in chemistry.
